Re: Ground Water Monitoring Results Report
November and December 2005 and January 2006
Newfield, NJ Facility
TRC Project No. 20341-0010-00010

Dear Ms. Gaffigan:

On behalf of Shieldalloy Metallurgical Corporation (SMC), TRC Environmental Corporation (TRC) is pleased to submit four (4) copies of the Ground Water Monitoring Results Report for November and December 2005 and January 2006 prepared as part of the ongoing monthly and quarterly ground water monitoring activities at the SMC Newfield, New Jersey facility.

Please note that SMC has discontinued the quarterly sampling of monitoring well SC22D due to the fact that this well has been compromised from the previous insitu pilot testing conducted on it in early 2001. Monitoring well MWH-4 has been chosen to replace SC22D as it is located about 40 feet downgradient of SC22D and is screened at a similar depth interval of 119 to 129 feet below ground surface.

Also, attached to one copy of the report is a diskette with the analytical results from the November, December and January sampling events provided in NJDEP Hazsite format.

If you have any questions regarding this report, please do not hesitate to contact me at (860) 298-6225.

Very truly yours,

TRC ENVIRONMENTAL CORPORATION

Lawrence J. Butlien, L.E.P.
Sr. Project Hydrogeologist
